IMPORTANT SAFETY INSTRUCTIONS

CAUTION
RISK OF ELECTRIC SHOCK DO NOT OPEN

CAUTION : TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE REAR COVER. NO USER SERVICEABLE PARTS INSIDE. REFER TO QUALIFIED SERVICE PERSONNEL.

Graphic Symbol Explanation

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated ′dangerous voltage′ within the product′s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING - To Prevent Fire or Shock Hazard, Do Not Expose This Monitor To Rain or Moisture.

1. Read Instructions : All the safety and operating instructions should be read before the appliance is operated.

2. Retain Instructions : The safety and operating instructions should be retained for future reference.

3. Heed Warnings : All warnings on the monitor and in the operating instructions should be adhered to.

4. Follow Instructions : All operating and user instructions should be followed.

5. Cleaning : Unplug this monitor from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning. Exception. A monitor that is meant for uninterrupted service and that for some specific reason, such as the possibility of the loss of an authorization code for a CATV converter, is not intended to be unplugged by the user for cleaning or any other purpose may exclude the reference to unplugging the monitor in the cleaning description otherwise required in Item 5.

6. Attachments : Do not use attachments not recommended by Samsung as they may cause hazards.

7. Water and Moisture : Do not use this monitor near water for example, near a bathtub, wash bowl, kitchen sink or laundry tub, in a wet basement or near a swimming pool and the like wet basement or near a swimming pool and the like.

8. Accessories : Do not place this monitor on an unstable cart, stand, tripod, bracket or table. The monitor may fall, causing serious injury to a child or adult and serious damage to the appliance. Use only with a cart, stand, tripod. bracket or table recommended by Samsung, or sold with the monitor. Any mounting of the monitor should follow Samsung′s instructions and should use a mounting accessory recommended by Samsung.

9. Ventilation : Slots and openings in the cabinet are provided for ventilation and to ensure reliable operation of the monitor and to protect it from overheating and these openings should never be blocked by placing the monitor on a bed, sofa, rug or other similar surface. This monitor should never be placed near or over a radiator or heat register. This monitor should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or Samsung′s in structions have been adhered to.

10. Installation : Do not install near any heat sources such as radiators, heat registers,stoves, or other appliances (including amplifiers) that produce heat.

11. Power Sources : This monitor should be operated only from the type of power source indicated on the making label. If you are not sure of the type of power supply to your installation site, consult your Samsung dealer or local power company.

12. Grounding or Polarization : For monitors equippedwith a 3-wire grounding-type plug having a third(grounding) pin. This plug will only fit into a grounding type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the grounding-type plug.

13. Power : Cord Protection-Power supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the monitor.

14. Lightning : For added protection for this monitor during a lightning storm or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the cable system. This will prevent damage to the monitor due to lightning and power-line surges.

15. Overloading : Do not overload wall outlets and extension cords as this can result in a risk of fire of electric shock.

16. Object and liquid Entry : Never push objects of any kind into this monitor through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the monitor.

17. Servicing : Do not attempt to service this monitor yourself as opening or removing cover may expose you to danger ous voltage or other hazards. Refer all servicing to quailfied service personnel.

18. Handling : Do not put vessels such as vases filled with liquids on this monitor.

19. Damage Requiring Service :   Unplug this monitor from the wall outlet and refer servicing to qualified service personnel under the following conditions.

　a. When the power-supply cord or plug is damaged.

　b. If liquid has been spilled or objects have fallen into the monitor.

　c. If the monitor has been exposed to rain or water.

　d. If the monitor does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and require extensive work by a qualified technician to restore the monitor to its normal operation.

　e. If the monitor has been dropped or the cabinet has been damaged.

　f. When the monitor exhibits a distinct change in performan-cethis indicates a need for service.

20. Replacement Parts :   When replacement parts are required, be sure the service technician has used replacement parts specified by Samsung or have the same characteristics as the original parts.
Unauthorized substitutions may result in fire, electric shock or other hazards.

21. Safety Check :   Upon completion of any service or repairs to this monitor, ask the service technician to preform safety checks to determine that the monitor is in proper operating condition.

WARNING (availabel for SMT-1931,SMT-2731)

This equipment has been tested and found to comply the limits for a class A digital device, pursuant to part 15 of the FCC Rules and ICES-003 of Industry Canada.
These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generate, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications.
Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

User-Installer Caution

Your authority to operate this FCC verified equipment could be voided if you make changes or modifications not expressly approved by the party responsible for compliance to part 15 of the FCC Rules.

Information to user

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found tocomply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules.
These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.
This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications.
Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

This device complies with Part 15 of the FCC Rules.
Operation is subject to the following two conditions : (1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
If necessary, consult your dealer or an experienced radio/television technician for additional suggestions.
You may find the booklet called how to Identify and Resolve Radio/TV Interference Problems helpful.
This booklet was prepared by the Federal Communications Commission.
It is available from the U.S. Government Printing Office, Washington, DC 20402, Stock Number 004-000-00345-4.

IC Compliance Notice

This Class (A) digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

This Class A digital apparatus complies with Canadian ICES-003.

Warning
This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

CALIFORNIA USA ONLY

This perchlorate warning applies only to primary CR (Manganese Dioxide) LIthium coin cells in the product sold or distributed ONLY in California USA.
"Perchlorate Material - special handling may apply,
See www.dtsc.ca.gov/hazardouswaste/perchiorate."

Contents

Unpacking

Remove the package cover and place the product on a flat and secure surface or in the installation location.
Check whether all the following devices and accessories are included with the main system.
The colour and the appearance may differ depending on the product .

| security-LED MONITOR | REMOTE & BATTERIES | VGA SIGNAL CABLE | POWER CORD | USER GUIDE | USER'S MANUAL CD |
Viewing the Control Panels

Front View

❶ Remote controller sensor.

❷ MENU
Activates and exits the On Screen Display.

Audio-B input : Right (RED), Left (White)

❾ AUDIO-A
Audio-A input : Right (RED), Left (White)

Note

When you don't use video looping output ,please unplug video looping output cable or connect a 75Ω terminal resistance at the video looping output jack .Otherwise,it will cause the signal scope oversized which bring about brightness distortion.

Remote Controller

❶ **POWER**
Turns the Power On or Off.
There will be a few seconds delay before display appears.

❷ **Number button**
Changes the SYSTEM ID for remote controller.
With the SYSTEM ID button pressed, entered the desired NUMBER by pressing the corresponding button(0~9) to set up the Remote Controller ID

❸ **SOURCE**
Press the 'SOURCE' button to change the input signal source.

❹ **VOLUME +, -**
Adjusts the audio volume.

❺ **MUTE**
Press to mute the sound temporarily.
Displayed on the bottom left of the screen.
Press the MUTE button again to cancel the Mute function. Alternatively press the - or + button to cancel the Mute function.

❻ **MENU**
Open the on-screen menu and exit from the menu screen or close screen adjustment menu.

❼ **ENTER**
Activates a highlighted menu item.

❽ **AUTO - Available In VGA mode Only**
Adjusts the screen display automatically.

❾ **SYSTEM ID**
Setting the SYSTEM ID of remote controller.
Refer to ❷Number button.

❿ **ID RESET**
Resets 1(default value) for the remote control ID.

⓫ **FREEZE - Available in Video A/B,HDMI Mode**
Press the button once to freeze the screen. Press it again to unfreeze.

⓬ **P.MODE**
Press to select a pre-defined Picture Mode of the monitor or to change the picture atmosphere as required. When you press this button, current mode is displayed on the lower center of the screen. The monitor has three auto matic picture settings that are preset at the factory. Then push button again to circle through available reconfigured modes.
(Dynamic, Standard, Movie)

⓭ **PIP （Available in VGA/HDMI Mode）/A-SWITCH**
Push the PIP button to turn PIP screen On/Off. (PIP is not available for SMT-1935/SMT-2233)
After pressing A-Switch button, monitor will automatically switch input signal, Video-A -> Video-B -> VGA -> HDMI according to the interval set in the menu.

⓮ **UNDER SCAN - Available in Video A/B,HDMI Mode**
Displays the entire video signal on the screen.

⓯ **▼▲/◀▶ buttons**
Moves from one menu item to another horizontally, vertically or adjusts selected menu values.
Installing batteries in the Remote Control
1. Lift the cover at the back of the remote control upward as shown.

2. Install two AAA size batteries.
    Make sure to match the "+" and "−" ends of the batteries with the diagram inside the compartment.

3. Replace the cover.
    Assuming typical TV usage, the batteries last for about one year.

NOTE

· Use the remote control within 23 feet from Monitor.
· Bright light may affect the performance of the remote control. Avoid using nearby special fluorescent light or neon signs.

Connecting to External Devices.

The product can be connected to an external device such as Camera, DVR, External Monitor, etc.

Securing the Installation Space

Keep the required distances between the product and other objects (e.g. walls) to ensure proper ventilation.

Failing to do so may result in fire or a problem with the product due to an increase in the internal temperature of the product.

✎ When using a stand or wall-mount, use parts provided by Samsung Techwin only.

▪ If you use parts provided by another manufacturer, it may result in a problem with the product or an injury due to the product falling.

✎ The appearance may differ depending on the product.

✎ Be careful when you contact the monitor because some parts can be somewhat hot.

Installation with a stand.   **Installation with a wall-mount.**

▶ Screen
   Image Lock , PC Position , Image Reset

● Image Lock (Coarse and Fine Tuning of the Image)

The purpose of picture quality adjustment is to remove or reduce picture noise.
If the noise is not removed by Fine-tuning alone, then adjust the frequency as best as possible (coarse) and Fine-tune again.
After the noise has been reduced, re-adjust the picture so that it is aligned on the center of screen.

Melody	:	Off
ECO Saving	:	Low
Auto Switch	:	Medium
System ID	:	High
No Signal OSD	: On	▷
Screen Burn Protection		▷

♦ Move   ↵ Enter   ◀ Return
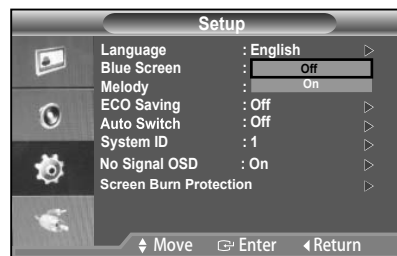

1. Press the MENU and ▼/▲ button to select the Setup menu.
2. Press the ENTER or ▶ button.

3. Press the ▼/▲ and ENTER button to select the Blue Screen or Melody menu.
4. Press the ▼/▲ and ENTER button to select the setting you want.

● Blue Screen: Off/On

If no signal is being received or the signal is very weak, a blue screen automatically replaces the noisy picture background. If you wish to continue viewing the poor picture, you must set the "Blue Screen" mode to "Off".
※ In HDMI Mode, "Blue Screen" can not be adjusted.

● Melody: Off/Low/Medium/High
You can hear melody sound when the monitor is powered on or off.
You can hear the melody when the monitor is turned on even if you turn the volume down to zero.
5. Press the MENU button to exit.

▶ ECO Saving

	Screen Burn Protection	▶
	♦ Move ↵ Enter ◀ Return	

This function adjusts the brightness of the Monitor so as to reduce power consumption. When watching Monitor at night, set the"Energy Saving" mode option to "High" to reduce eye fatigue as well as power consumption.

● 75% : Change the monitor power consumption to 75% of the default level.
● 50% : Change the monitor power consumption to 50% of the default level.
● Off : Deactivate the Eco Saving function.

1. Press the MENU and ▼/▲ button to select the Setup menu.
2. Press the ENTER or ▶ button.
3. Press the ▼/▲ and ENTER button to select the Energy Saving menu.
4. Press the ▼/▲ and ENTER button to select the setting you want.
5. Press the MENU button to exit.

	Screen Burn Protection	60 sec
	♦ Move ↵ Enter ◀ Return	

When you configure Auto Switch, monitor will automatically switch input signal Video-A -> Video-B -> VGA -> HDMI according to the time interval you set in the menu.

1. Press the MENU and ▼/▲ button to select the Setup menu.
2. Press the ENTER or ▶ button.
3. Press the ▼/▲ and ENTER button to select Auto Switch menu.
4. Press the ▼/▲ and ENTER buttons to set Time Interval.

▶ Setting up Your PC Software (Based on Windows XP)
The Windows Display Properies for a typical computer are shown above. The actual screens on your PC may be different depending upon your particular version of Windows and your particular video card. Even if your actual screens look different, the same, basic set-up information will apply in almost all cases. (If not, contact your computer manufacturer or Samsung Dealer.)

1. First, click on "Control Panel" on the Windows start menu.
2. When the control panel window appears, click on "Display" and a Display Properies window will appear.
3. Click on "Setting" .
4. Navigate to the "Screen resolution" tab on the Setting window.
   The correct size setting (resolution):
   Optimum- SMT-2233/SMT-2731: 1920 x 1080
   　　　　　SMT-1935: 1280 x 1024
   　　　　　SMT-1931: 1366 x 768

If a vertical-frequency option exists on your Settings window, the correct value is "60Hz" or "75 Hz". Otherwise, just click "OK" and exit the window.

▶ Display Modes

Both screen position and size will vary depending on the type of monitor and its resolution. The resolutions in the table are recommended. (All resolutions between the supported limits are supported.)

※ The interlace mode is not supported.

※ The set might operate abnormally if a non-standard video format is selected.

※ Separate and Composite modes are supported. SOG is not supported.
▶ System ID
1. Press the MENU and ▼/▲ button to select the Setup menu.
2. Press the ENTER or ▶ button.
3. Press the ▼/▲ button to select the System ID.
4. Press the ▼/▲ and ENTER button to select the setting you want .(0~9)
5. Press the MENU button to exit.

▶ No Signal OSD

No Signal OSD determines whether "No Signal" displays on the screen or not.
If you set the No Signal OSD to On, the screen will displays "No Signal" when there is no video signal input.
If you set the No Signal OSD to Off, the screen will not display "No Signal" when there is no video signal input.

1. Press the MENU and ▼/▲ button to select the Setup menu.
2. Press the ENTER or ▶ button.
3. Press the ▼/▲ button to select the No Signal OSD.
4. Press the ▼/▲ and ENTER button to select the setting you want .
5. Press the MENU button to exit.

※ This function is not available in VGA and HDMI mode.

▶ Screen Burn Protection

To reduce the possibility of screen burn, this unit is equipped with Screen Burn Protection screen burn prevention technology.
Screen Burn Protection moves the picture slightly on the screen.
The Screen Burn Protection setting allows you to programme the time between movements of the picture in minutes.

Correct Disposal

Correct Disposal of This Product (Waste Electrical & Electronic Equipment)

(Applicable in the European Union and other European countries with separate collection systems)

This marking on the product, accessories or literature indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take these items for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product and its electronic accessories should not be mixed with other commercial wastes for disposal.
